

Selenase[®] (sodium selenite)

Company:
Biosyn Arzneimittel GmbH; Germany

Importer: Viralian Group Inc.

How supplied:

Sodium selenite solution for injection
50mcg Se/ml in 10ml vials.

Sodium selenite solution for injection
50mcg Se/ml in 2ml ampoules.

General Description:

Selenase[®] solution for injection is a medicinal product which belongs to the group of the mineral supplements. Sodium selenite pentahydrate, the active substance in the solution for injection, provides a source of selenium, which is an essential trace element in nutrition to ensure that the metabolism functions efficiently.

Indications:

selenium deficiency which cannot be corrected by selenium intake from food sources.

Contraindications:

- Hypersensitivity to sodium selenite pentahydrate or to any of the excipients
- Selenosis

Adverse reactions:

Like all medicines, selenase[®] solution for injection can cause side effects, although not everybody gets them. Frequency not known (cannot be estimated from the available data): pain at the place after intramuscular administration.

Pregnancy category:

There are no data from the use of selenase[®] solution for injection in pregnant women. No adverse effect of sodium selenite on the pregnancy or the unborn child is expected, provided that it is used in case of proven selenium deficiency.

SERO-TET™
(Human Tetanus Immune globulin)

How supplied:

250 I.U./vial x In-house packing unit

Company:

Green Cross Corp; South Korea.

Importer:

Ahran Tejarat Co.

General Description:

Sero-Tet is a sterile solution containing tetanus immune globulin which is prepared by Cohn fractionation from plasma of individuals with high titers of antibody to the tetanus antigen and heat inactivation step in manufacturing process (60 °C, 10 hrs) is used to inactivate infectious agents such as Hepatitis B Virus, Hepatitis C Virus, Human Immunodeficiency Virus, and so on. A donor unit found to be negative to anti-HIV 1/2, anti-HCV and HBsAg are only used in preparation of Sero-Tet.

INDICATIONS:

Passive immunization against infection caused by *Clostridium tetani*.
For IM injection only.

Adults and Children: Prophylaxis for Tetanus: Usual Dose: 250 IU.

Treatment of Tetanus: Dose should not be less than 5000 IU.

Special Precautions:

Sero-Tet should not be administered IV.

It should be administered with caution to individuals who have exhibited previous systemic allergic reactions to immune globulin.

Epinephrine (0.1-0.5 mL, 1:1000) should be available for immediate treatment.

Store at 2-8°C.

Pregnancy category (US FDA): C

Bendex™
(albendazole)

How supplied:

400 mg albendazole, chewable tablets in 100 tabs. container.

Company:

Cipla; India

Importer:

Ahran Tejarat Co.

General Description:

albendazole is an orally administered broad-spectrum anthelmintic. Its primary use is as a topical pesticide for control of parasites in particular various worm infestations. It has inhibitory effect on tubulin polymerization, resulting in loss of cytoplasmic microtubules.

Treatment of parenchymal neurocysticercosis due to active lesions caused by larval forms of pork tapeworm, *Taenia solium* ; treatment of cystic hydatid disease of the liver, lung, and peritoneum caused by larval forms of dog tapeworm, *Echinococcus granulosus* .

CONTRAINDICATIONS:

Hypersensitivity to benzimidazole compounds or any component of the product.

ADVERSE REACTIONS:

headache (11%); reversible alopecia (2%); erythema multiforme, abdominal pain, nausea/vomiting (6%). abnormal LFTs (16%); acute liver failure, hepatitis. agranulocytosis, granulocytopenia, leukopenia, pancytopenia, thrombocytopenia (less than 1%).

Pregnancy category (US FDA): C

Liv.52 DS™

How supplied:

90 oral tablets per container

Company:

Himalaya; India

Importer:

Ahran Tejarat Co.

General Description:

Herbal Liv-52 DS is a unique, all-natural, complex multi-ingredient formula. It is safe and effective in protecting the liver against harmful toxins from drugs, alcohol, food and water. Herbal Liv.52 DS helps regulate levels of enzymes and optimizes assimilation. Herbal Liv.52 DS has also been found to be associated with an increase in serum albumin, which is another indication of the liver protection it provides. Recent work shows that Herbal Liv.52 DS has cholesterol-regulating action. Clinically, it helps maintain healthy levels of serum cholesterol, lipoproteins, phospholipids and triglycerides.

INDICATIONS:

- Viral hepatitis
- Alcohol-induced liver damage
- Jaundice and anorexia during pregnancy
- Anorexia and suboptimal growth
- Drug-induced hepatitis
- Pre-cirrhotic conditions and early cirrhosis
- As a supportive treatment during hemodialysis
- As an adjuvant to anti-cancer drugs

CONTRAINDICATIONS:

No absolute contraindications.

ADVERSE REACTIONS:

Liv.52 DS tablets are not known to have any side effects if taken as per the prescribed dosage.

Pregnancy category:

No clinically significant complications

Estrin™
(Conjugated Estrogen vaginal cream)

How supplied: Conjugated Estrogen vaginal cream
Company: Cipla; India
Importer: Ahran Tejarat Co.

General Description:

Estrin Cream (conjugated estrogen) is a mixture of estrogen hormones used to treat the vaginal symptoms of menopause such as dryness, burning, irritation, and painful sexual intercourse. Estrogen is a female sex hormone produced by the ovaries. Common side effects include nausea/vomiting, bloating, breast tenderness, headache, or weight changes.

INDICATIONS:

Treatment of atrophic vaginitis and kraurosis vulvae
Treatment of moderate to severe dyspareunia, a symptom of vulvar and vaginal atrophy, due to menopause.

CONTRAINDICATIONS:

Estrin vaginal cream therapy should not be used in women with any of the following conditions:

- Undiagnosed abnormal genital bleeding
- Known, suspected, or history of breast cancer
- Known or suspected estrogen-dependent neoplasia
- Active DVT, PE, or a history of these conditions
- Active arterial thromboembolic disease (for example, stroke and MI), or a history of these conditions
- Known anaphylactic reaction or angioedema to conjugated estrogen Vaginal Cream
- Known liver dysfunction or disease
- Known protein C, protein S or antithrombin deficiency or other known thrombophilic disorders
- Known or suspected pregnancy.

ADVERSE REACTIONS:

Breakthrough bleeding/spotting, vaginal discharge

Pregnancy category (US FDA):

Estrin vaginal cream should not be used during pregnancy. There appears to be little or no increased risk of birth defects in children born to women who have used estrogens and progestins as an oral contraceptive inadvertently during early pregnancy.

Cystone™

How supplied:

60 oral tablets per container

Company:

Himalaya; India

Importer:

Ahran Tejarat Co.

General Description:

Cystone is a himalaya herbal formulation used to treat and prevent urinary tract infections and kidney stone formation. Cystone reduces the concentration of stone forming substances in the blood and expels them from the body. It Breaks up stones by acting on mucin, a gummy substance which binds particles together. It also reduces oxidative stress, which is implicated in urinary stone formation. Cystone's antibacterial action along with its antibacterial, anti-inflammatory, pain relieving and urine pH normalizing actions prevent stone formation in the urinary tract and provide relief from pain and burning urination associated with urinary stones and urinary tract infections.

INDICATIONS:

Prevent and treat urinary stones.

Prevent recurrence of stones after surgery.

As an aid in preventing recurrence of urinary tract infections.

Aid in treating burning urination.

CONTRAINDICATIONS:

There are no contraindications for the use of Cystone.

ADVERSE REACTIONS:

Cystone does not produce any side effects, if taken as per the prescribed dosage.

Pregnancy category:

No clinically significant complications
